

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

1. (original): A crosslinkable elastomer composition for plasma process comprising a crosslinkable elastomer and a carbon fluoride filler.
2. (original): The crosslinkable elastomer composition of Claim 1, which further comprises a silicic compound inorganic filler and/or a filler comprising a synthetic polymer having a thermally and chemically stable aromatic ring in the main chain.
3. (original): The crosslinkable elastomer composition of Claim 2, wherein said synthetic polymer having a thermally and chemically stable aromatic ring in the main chain is a synthetic polymer having an amide bond or an imide bond in the main chain.
4. (original): The crosslinkable elastomer composition of Claim 2, wherein said silicic compound inorganic filler has average particle size of at most 0.5  $\mu\text{m}$ .
5. (original): The crosslinkable elastomer composition of Claim 2, wherein said filler comprising a synthetic polymer having a thermally and chemically stable aromatic ring in the main chain has specific surface area of at least 0.5  $\text{m}^2/\text{g}$ .
6. (currently amended): The crosslinkable elastomer composition of Claim 1, ~~2, 3, 4 or 5~~, wherein said carbon fluoride filler is heat treated at 300 to 550°C in advance.
7. (currently amended): The crosslinkable elastomer composition of Claim 1, ~~2, 3, 4, 5 or 6~~, wherein said crosslinkable elastomer is a perfluoro elastomer.

Preliminary Amendment  
National Stage of PCT/JP04/000049

8. (currently amended): A molded article for plasma process comprising the crosslinkable elastomer composition of Claim 1, ~~2, 3, 4, 5, 6 or 7~~.

9. (currently amended): A sealing material for plasma process comprising the crosslinkable elastomer composition of Claim 1, ~~2, 3, 4, 5, 6 or 7~~.
